-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This action is responsive to communications: Supplemental Preliminary Amendment filed 8/21/02.
2. Claims 2-5, 8-12, 14-18, 20-24, 26-30, and 32-48 are pending in the case. Claims 2, 3, 4, 11, 14, 15, 16, 23, 26, 27, 28, and 35, are independent claims.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 11, 8, 9, 10, 12, 20-24, and 32-48, are drawn to hypermedia and forming links between distinct versions, classified in 501.1.
 - II. Claims 2, 5, 14, 17, 18, 26, 29, 30 drawn to compression techniques, classified in class 382, subclass 232.
 - III. Claims 3, 15, and 27, drawn to encryption and network security, classified in class 713, subclass 201.
 - IV. Claims 4, 16, and 28, drawn to image analysis, classified in class 382, subclass 112.

Inventions I through IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as displaying an image on a display device. The invention described in Group I is directed toward detecting reference and forming links between distinct locations. In the instant case, invention II has

Art Unit: 2178

separate utility such as compressing and decompressing techniques, which seem to be directed toward image analysis. The compression techniques of Group II can be applied to images for display in separately usable. Invention III has separate utility such as presenting encryption and decryption techniques directed toward network security. Encryption techniques can be separately usable within a network security environment and distinct from a reference detection method and link generating method. Invention IV includes separate utility such as presenting image analysis methods for the image display on a display device. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, and IV, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
